

HEINE DELTA® 20 Plus Dermatoscope

LED NOW IN HEINE QUALITY.

- ⚡ Polarization/Immersion
- ⚡ High performance LEDs
- ⚡ High-resolution optics

For dermatoscopic examination for early diagnosis of malignant melanoma. Also for the examination of non-melanocytic lesions, basal cell carcinoma and dermatofibroma. The skin surface refracts the light and partially reflects it. That's why either an immersion liquid between the dermatoscope and the skin (for example dermatoscopy oil) or polarized light is needed to observe pigment cells or other structures in the deeper skin layers.

- ⚡ **Immersion and polarization.** With different contact plates (contact plate N for immersion and contact plate P for polarization) the examination can be matched with the respective lesion, because some characteristics are more visible when a liquid is used, others under polarized light.
- ⚡ **4 high performance LEDs** produce an absolutely homogenous and bright illumination with excellent color rendering (Color rendering index CRI >87). 2 of the LEDs can optionally be switched off for lateral illumination.
- ⚡ **High-resolution optics with achromatic lens system.** 10x to 16x magnification, distortion-free edge-to-edge, very large, highly detailed image.
- ⚡ **Adjustable Eyepiece.** Individual focusing, range of correction -6 to +6 dpt.
- ⚡ **Detailed compendium with photographic atlas included.** Simplifies the differential diagnosis of pigmented lesions.

HEINE® NC1 Dermatoscope

Non-Contact Dermatoscope with LED^{HQ}

Speed and diagnostic accuracy for the daily demands of a busy practice.

- **Polarized Illumination** for detailed views of the crystalline and vascular structures without any need for contact liquids.
- **Precision HEINE Optics with 6x magnification** – High quality, achromatic optical system provides unmatched sharpness and resolution.
- **LED in HQ** – the new standard in LED illumination defines optimal light intensity, homogeneity and color rendering. Color temperature: 5,000K, Color Rendering Index (CRI) >80, special index for red colors (R9) >35 on a maximum scale of 100. This ensures true tissue color for the most accurate diagnosis.
- **Optional contact plate with additional magnification.** Adding the optional contact plate transforms the NC 1 to a traditional contact dermatoscope with increased magnification (9x) and a scale. The speed and ease of use of a non-contact dermatoscope combined with the detail and precision of a contact device, all in one instrument!

HEINE mini3000® Dermatoscope

A Dermatoscope in a handy pocket format

- ∴ Modern pocket dermatoscope
- ∴ Solid metal construction
- ∴ 10x magnification

Modern pocket dermatoscope in a unique, compact design with high quality optics, 10x magnification with focusing optics, and metal instrument head. Can be used with the mini3000 handle system. Handle available in black and blue.

- ∴ **Xenon Halogen bulbs.** Concentrated, bright light for uniform illumination with exact color rendering.
- ∴ **20,000 ON/OFF** switch cycles guaranteed.
- ∴ **High quality color-neutral optic system** with achromatic lenses provides **distorsion free edge to edge, sharp images** of the whole area under examination with **10x magnification**.
- ∴ **5 contact plates for the examination to choose from:** contact plates with and without scale which can be autoclaved.
- ∴ **Special small contact plate** for the examination of difficult to access lesions.
- ∴ Detailed dermoscopy compendium.
- ∴ **Replaceable batteries (Size AA)**, or optional rechargeable battery with mini NT table charger*.
- ∴ **2-piece handle and head.** Easy to maintain, flexible.
- ∴ **Award winning design.** Maximum quality with minimum dimensions.

HEINE mini3000® LED Dermatoscope with LED Illumination in HEINE Quality HQ

- ∴ Maintenance-free pocket instrument
- ∴ Bright LED illumination
- ∴ Up to 10 hours operation time

Modern dermatoscope with maintenance-free LED illumination. Twice as bright as conventional Xenon Halogen dermatoscopes.

- All of the features of the mini3000 Dermatoscope, with the addition of:
- ∴ **Maintenance-free**, no need to ever exchange the LED.
 - ∴ LED Thermal management for a **consistent light output throughout the whole working life**.
 - ∴ High performance LED: bright and absolutely homogeneous **illumination with an excellent color rendering** – color temperature 4000K, color rendering index >95.
 - ∴ **100% more light** compared to Xenon Halogen instruments.
 - ∴ **Exclusive Battery Performance Indicator:** When the instrument is switched on, the maximum light intensity is shown, then the light intensity is regulated down to the level that corresponds to the current charge status of the battery so you know when your batteries need changing.
 - ∴ **Exclusive fade-out function** reduces illumination intensity with battery level to let you know when to replace.
 - ∴ **Operation time up to 10 hours.** The batteries need to be changed less often and the rechargeable batteries last longer.
